

TykeSkateR®

SKATING TRAINER

TykeSkater® black

Product number: 338000

TykeSkater® red

Product number: 338000PU

TykeSkateR® is meant for people learning to skate. In addition to private use, its sturdiness and wide adjustment range make it also highly suitable for professional use.

TykeSkateR® enables the user to learn how to skate in the right posture. The shape of the product gives the user's feet plenty of room to kick and the feet won't hit the support while skating.

It can be height-adjusted without tools to fit users from kids to grown-ups. Height adjustment, assembly and folding is done without tools. The round frame helps the skating support slide better. Since it is foldable, it is easy to transport and store.

98,5 cm x 77 cm x 10 cm

Handlebar with elbow supports

Available as an accessory

Product number: 338010

The handlebar with elbow supports offers extra stability for those users who need it. Changing from the regular handlebar to the elbow-support model is fast and easy. Distance and depth of the supports can be adjusted. The elbow support also has an assistant's handle for guiding for example a visually impaired person skating.
